Mobile Application Development
Lab 6 Jetpack Compose Navigation

The purpose of Lab 6 is to modify Lab 5 to include Jetpack Compose Navigation. The completed application will function similarly to lab 5. However, the main screen will have an additional button. When the button is pressed it will use Jetpack Compose Navigation to open a second screen that lists all the Bible verses along with their books, chapters and verses.

The lab report should contain a brief description of what the lab does followed by screen images of the source code and successful execution. The lab report should also contain an explanation of any problems encountered while completing the lab, and the estimated time for completion. Submit the lab report along with the entire project source code (zipped together) to Canvas by the due date. If you have any questions, please ask.
