Lab 7 Jetpack Compose Navigation with Parameter Passing

The purpose of Lab 7 is to modify Lab 6 to include Jetpack Compose Navigation with parameter passing. The completed application will function similarly to lab 6. However, the random verse and welcome message will display on a screen instead of the main screen. The entered name should be passed as a parameter to the screen that will display the personalized welcome message and random Bible verse. It should still customize the welcome message as described in Lab 3.

The lab report should contain a brief description of what the lab does followed by screen images of the source code and successful execution. The lab report should also contain an explanation of any problems encountered while completing the lab, and the estimated time for completion. Submit the lab report along with the entire project source code (zipped together) to Canvas by the due date. If you have any questions, please ask.
