Mobile Application Development
Lab 8 Accessing Web Applications with Retrofit

The purpose of Lab 8 is to introduce students to building mobile applications that access data via the internet using Retrofit. This lab will be a modification of Lab 7. It will have the same functionality. However, it will retrieve the scripture data in Json format from the following REST API.

<https://comp322-versedb-default-rtdb.firebaseio.com/verses.json>

Review the above URI to determine the base URI and endpoint. Open the link by clicking on it to determine the serialized fields.

The lab report should contain a brief description of what the lab does followed by screen images of the source code and successful execution. The lab report should also contain an explanation of any problems encountered while completing the lab, and the estimated time for completion. Submit the lab report along with the entire project source code (zipped together) to Canvas by the due date. If you have any questions, please ask.
